App crashes all the time on iPad as well as the balances are always off as compared to my bank balances (not considering in progress debits/deposits). Sometimes as far off as \$1,000's of dollars off which is not even remotely close nor any rationale for that error.

Loses entries, no not rely on it!!!

I'm constantly losing entries I KNOW I put in my phone but never make it to the desktop!!! I can't trust it, so it's crap as far as I'm concerned!!!

This app is garbage, but there's no other choice. The account update function REFUSES to let me change a password to a credit card site. The app WON'T sync with Chase Bank, and only one of my desktop accounts appears on my phone.

Horrible user experience.

This app is clearly not written for iOS. So many of the apps functions are not properly formatted for iOS.
